

Cloud Issuance of Secure Virtual Card

- Tokenized ID as a mobile credential. **No critical user data.**
- **Dynamic QR code** that changes every 5 seconds.
- Virtual card issued via electronic messages (**email, WhatsApp, SMS** etc)
- **No App** development costs needed.
- **No physical cards**, more sustainable.
- Personalized virtual card can be used as a unique credential such as special **discount coupon**.

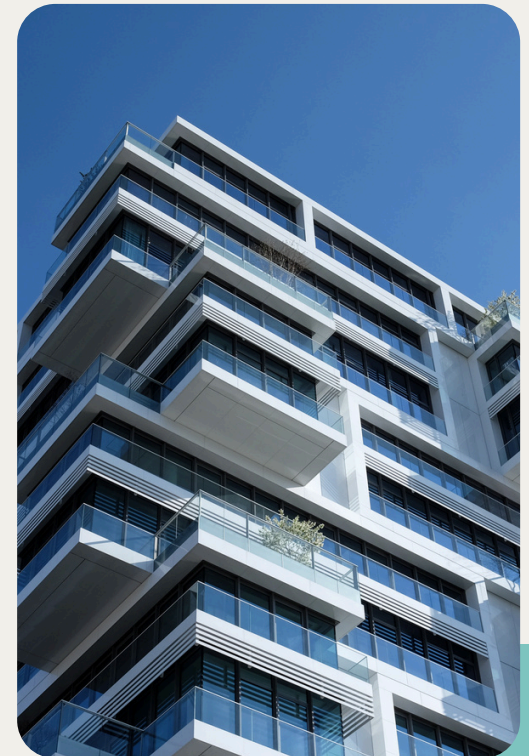

Authentication with automated devices

- **Self check-in** or authentication at automated devices or kiosks.
- **Scan and authenticate** to open doors, record attendance or other registered IoT activities.
- **Different authentication devices** such as QR code readers and turnstiles.
- With APIs developed, any Android devices with a camera can become an idLink virtual reader, **e.g. mobile phones, tablets, network panels or robots.**

Property Management Solutions

Industry Challenges

Technology Integration

- Keep pace with **latest technology**.
- **Integration** into the management processes.

Retention of Quality Tenants

- Enhance **user experience**.
- **Maintaining high satisfaction** levels to minimize turnover and vacancy rates.

Environmental Sustainability

- Implement **sustainable** practices and meet environmental standards.
- **Appeal** to environmentally conscious tenants.

Secure Data Protection

- **Safeguard sensitive data** from cyber threats.
- Compliance with **data protection** regulations.

Vrcn's Answers

idLink Cloud Identity Authentication

Over-the-Air Issuance of Secure Virtual Card.

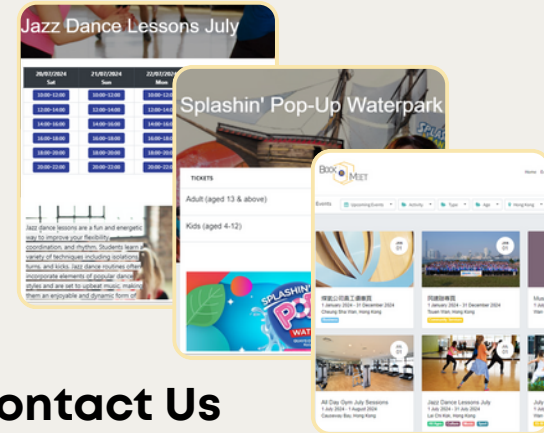

Unmanned Facilities Booking with IoT system integration.

Costs saving

- **Patented** idLink cloud door opening solution utilizes latest ICT technology to create a more **secure yet convenient** access control system.
- Authenticates users without hardware door controllers. The lean architecture **saves significant cost** in hardware and installation.
- Reports over cloud, **saves processing effort** required by traditional access control practice

Unmanned Facilities Booking

- **BOOK MEET**, a 24 x 7 e-platform for **activities and facilities booking**.
- Empowering property management company to run facilities booking services with **minimal manpower and security resources**.
